

CHANGE + OPTIMISATION

ALLEN+CLARKE

At Allen + Clarke we give a damn – about people, each other, our clients, and about our community, our planet and society.

We are trusted advisors to the public sector, businesses and NGOs.

Change + Optimisation Services

Change is constant and accelerating and we are all working in a less certain environment! We will walk alongside you as you embrace change, so it works for your business and accelerates your success.

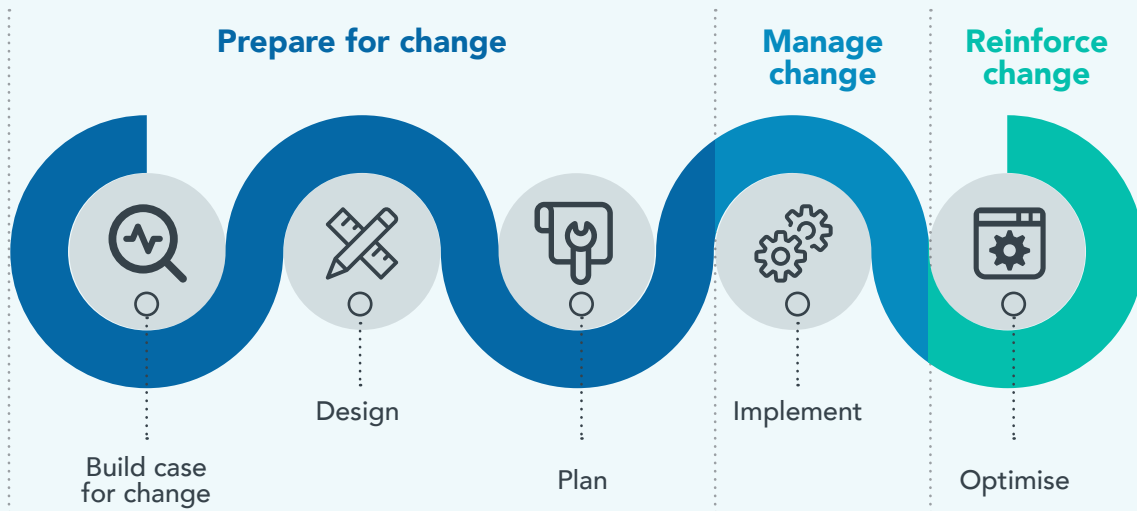

How we can help...

- + We will help you design operating models, frameworks and ways of working that add value and have impact.
- + We will work with you to fix things that are broken, and solve problems. Where operations or service delivery models require change or a refresh, we can help.
- + We will align your operations, strengths and capability with your strategy and priorities, and ready you for emerging challenges.
- + We will support you to manage change – with people, your business unit, the whole organisation, or at a system level.
- + We will help you assess the impact of your change, measuring the benefits and value added to your organisation.
- + We are your trusted advisors - guiding, coaching, planning and applying best practice.

Partnership for change

We work with you to understand your organisation, your staff, your clients and your needs. We work with government organisations, NGOs, Māori and Pacific populations, and community groups to find out what really matters.

Trusted advisors

Allen + Clarke was founded in 2000 and has offices in Wellington and Melbourne. We work with people across Aotearoa New Zealand, Australia, the Pacific and Asia.

Our consultants specialise in strategic planning, policy development and regulation design, change and business optimisation, research and evaluation, governance, secretariat and programme management and international development.

It's about people

- + We place people at the centre – staff, consumers, whānau/family and communities.
- + We are inclusive. Partnership and genuine engagement are important to us.
- + We blend smart and innovative thinking with down-to-earth pragmatism.
- + We are collaborative. We leverage the insights, ability, energy and ideas of many.

Our company purpose is to mobilise passionate and capable people to tackle the challenges facing our society.
